### **Election/Restrictions**

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 1-10, drawn to a polyfunctional polymer monolayer.

Group 2, claims 11-14, drawn to a method of making a polyfunctional polymer monolayer.

Group 3, claim 15, drawn to a process for detection of a sample nucleic acid.

Group 4, claims 16-18, drawn to a process for purifying a compound from a sample.

Group 5, claim 19, drawn to a process for using the monolayer of claims 9-10 as an affinity chip.

Group 6, claim 20, drawn to a process for using the monolayer of claims 9-10 as a sensor chip.

Group 7, claim 21, drawn to a process for using the monolayer of claims 9-10 as a medical or diagnostic instrument..

Group 8, claim 22, drawn to a process for using the monolayer of claims 9-10 for the immobilization of starter molecules.

Group 9, claim 23, drawn to a process for using the polymer layer of claims 1-8 for gel separation.

2. The inventions listed as Groups 1-9 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The technical feature linking the inventions of Claims 1-23 appears to be that they all relate to a polyfunctional monolayer comprising an assembly of polymer chains each comprising a multitude of units carrying one or more functional groups.

However, Sundberg et al (U.S. Patent No. 5,624,711, issued 29 April 1997) teach the polyfunctional monolayer. Specifically, Sundberg et al teach a polyfunctional monolayer

Art Unit: 1634

comprising an assembly of polymer chains each comprising a multitude of units (polymer chains) carrying one or more functional groups (protective groups) (see Column 2, lines 15-32 and Column 4, line 51-Column 5, line 24).

Therefore, the technical feature linking Claims 1-23 do not constitute a special technical feature as defined by PCT Rule 13.2 because the linking technical feature does not define a contribution over the prior art and hence, restriction is required.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
